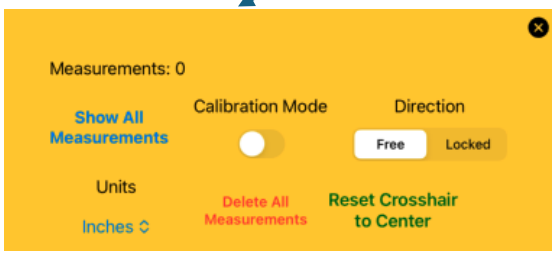
Measurement Controls

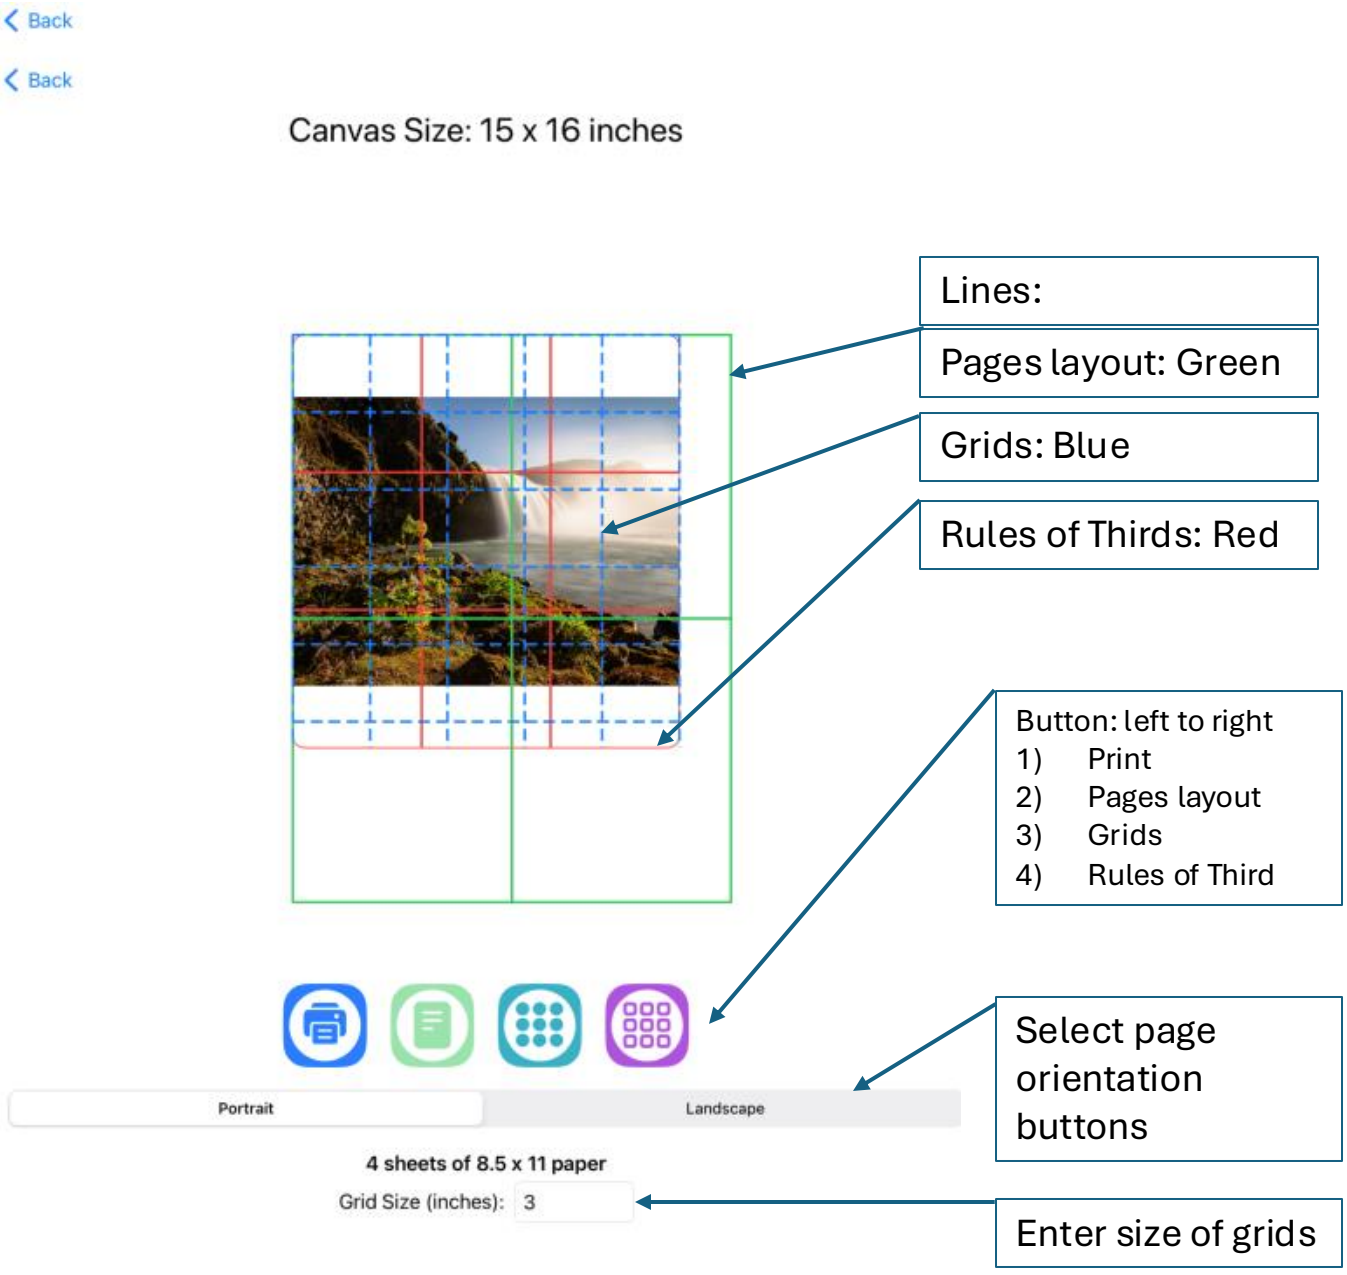


Button: left to right

1) Load image
2) Turn image on and off
3) Turn white background in image on and off.
4) Save
5) Turn on and off Rules of Thirds
6) Got to print preview and setup page

Instructions:
Load an image and place it how you want it to appear on the canvas. Anything outside the blue box will be cut off when printing. You can turn on or off the rule of thirds, image values, image visibility, and the white background behind the image. Tap on a measurement to delete it individually. When you're ready, click the printer button to go to the print preview and set up your page.

Printer Preview



Instructions:
Once you are satisfied with image you can select how you want pages to print portrait or landscape (GREEN LINES). You can select if you want grids and how far apart (BLUE LINES). You can turn on or off rules of thirds (RED LINES. Note: this prints to scale in "inches" and across multiple pages to the size of the canvas selected. If there is a small portion of the image spilled over due to printer. Reduce the canvas size by .5 or 1 inch.
